NEWSLETTER NO. 9

Welcome to the SiT newsletter!

We're excited to share our project's early activities and updates with you. In this edition, you'll find the latest news and updates of the project regarding MOOC development and modules development.

As you may know from the last newsletter, the SiT consortium has been conducting focus groups in partner countries with key stakeholders in the textile, garment and fashion industry to identify aspects of training and professional development of the **TCLF sector**.

The development of the training materials included in Work Package 3 are based on two important and emerging professions: **Bio-textile Technician** and **Recycling Manager**.

The project is now in this phase: the **development of the training materials**, which will be available in the form of modules and uploaded to a MOOC platform.

The modules will revolve around the **Bio-Textile Technician** and the **Recycling Manager** and will cover various topics related to bio-based techniques, sustainable production, digitalisation, quality control, textile recycling technologies, problem solving and critical thinking, environmental regulations and much more.

These training materials will be used in three different learning and training methods:

eLearning

eLearning material will be uploaded to a MOOC platform.

Face-to-face activities

Work-based learning

Development of a MOOC Platform

A MOOC platform will be developed to upload and host the training materials once they are ready.

This platform, which is part of Work Package 4, will be a modern and innovative tool to support students, future professionals and current workers in the TCLF sector to improve their knowledge and skills in the sector.

It is developed taking into account **interaction**, **acquisition of different competences**, **flexibility** and **engagement**, very important aspects for asynchronous online learning.

KEEP UPDATED!

The SiT project aims to improve co-operation between stakeholders from education, research and industry in order to promote green skills and entrepreneurship in the TCLF sector.
